Int. J. Gynecol. Obstet., 1989, 28: 401—404
International Federation of Gynecology and Obstetrics

Subject Index

Volume 28

N-acetyl-β-D-glucosaminidase, enzymuria, alanine aminopeptidase, kidney function in pregnancy, 9
acute abdomen syndrome, Ogilvie's syndrome, colonic pseudo-obstruction, puerperium complications, cesarean section, postcesarean section complications, 185
alanine aminopeptidase, enzymuria, *N*-acetyl-β-D-glucosaminidase, kidney function in pregnancy, 9
amniocentesis, polyhydramnios, 181
anatomy, intramural part, uterotubal junction, histology, 343
antenatal care, initial antenatal assessment, microcomputers, computerised questionnaire, patient input, 229
antenatal diagnosis, fetal arrhythmia, developmental characteristics, dual echocardiography, real-time ultrasound, 13
antibiotic prophylaxis, metronidazole, cesarean section, postoperative wound infection, metronidazole rectal suppositories, 103

bacterial vaginosis, cervical intraepithelial neoplasia, immunopotentiation, vaginal smears, Gynatren, 41
bacteriospermia, infertile men, semen analysis, 149
Bangladesh, characteristics, beliefs and practices, traditional midwives, 119
beliefs and practices, characteristics, traditional midwives, Bangladesh, 119
benign neoplasia, leiomyoma, female urethra, urethral tumor, rare lesion, excision biopsy, 381
bilirubin, primary biliary cirrhosis, liver needle biopsy, pregnancy, birth control pills, pre-eclampsia, 279
biparietal diameter, menstrual dates, ultrasound dates, normogram, 217
birth control pills, primary biliary cirrhosis, bilirubin, liver needle biopsy, pregnancy, pre-eclampsia, 279
blood transfusion, hysterectomy, menstrual irregularities, prophylactic antibiotics, health care dollars, human immunodeficiency virus, 137

cancer cervix, vesico-vaginal fistula, radical hysterectomy, vaginal reconstruction, sexual dysfunction, 77
celo-intestinal fistulae, extra-uterine pregnancy, obstructed labor, ruptured uterus, peritonitis, 177
cephalopelvic disproportion, pregnancy in adolescence, developing countries, labor complications, delivery, 5
cephalopelvic disproportion, true conjugate, maternal height, previous obstetric performance, fetal dimensions, previous cesarean section, 243
cerclage, rupture of membranes, pregnancy complications, 237
cervical carcinoma FIGO Ib, vaginal sonography, tumor staging, 283
cervical intraepithelial neoplasia, immunopotentiation, vaginal smears, bacterial vaginosis, Gynatren, 41
cervical ripening, prostaglandin gel, intravaginal, 21
cesarean section, metronidazole, antibiotic prophylaxis, postoperative wound infection, metronidazole rectal suppositories, 103
cesarean section, Ogilvie's syndrome, colonic pseudo-obstruction, puerperium complications, postcesarean section complications, acute abdomen syndrome, 185
cesarean sections, maternal mortality, developing countries, 337
characteristics, beliefs and practices, traditional midwives, Bangladesh, 119
chemiluminescence immunoassay, progesterone, saliva, pregnanediol-3α-glucuronide, ovulation, ultrasound, 45
Chlamydia psittaci, enzootic abortion, pregnancy, spontaneous abortion, thrombocytopenia, 369
collagen, uterine cervix, laminaria tent, legal abortion, collagenolytic activity, 361
collagenolytic activity, uterine cervix, laminaria tent, legal abortion, collagen, 361
colonic pseudo-obstruction, Ogilvie's syndrome, puerperium complications, cesarean section, postcesarean section complications, acute abdomen syndrome, 185
computerised questionnaire, antenatal care, initial antenatal assessment, microcomputers, patient input, 229
cost effectiveness, preterm birth, uterine monitoring, 127
Cu-7, intrauterine device (IUD), TCu380Ag, safety, efficacy, long-term use, 269
cystectomy, tumor, torsion, gangrene, salpingo-oophorectomy, hemorrhage, 21

delivery, pregnancy in adolescence, developing countries, labor complications, cephalopelvic disproportion, 5
developing countries, cesarean sections, maternal mortality, 337
developing countries, pregnancy in adolescence, labor complications, delivery, cephalopelvic disproportion, 5
developmental characteristics, fetal arrhythmia, antenatal diagnosis, dual echocardiography, real-time ultrasound, 13
dual echocardiography, fetal arrhythmia, antenatal diagnosis, developmental characteristics, real-time ultrasound, 13

eclampsia, pregnancy-induced hypertension, pre-eclampsia, pregnancy, fetal mortality, 211

ectopic, pregnancy, epidemiology, incidence, 351
ectopic pregnancy, pregnancy specific β-1-glycoprotein, β-human chorionic gonadotropin, enzyme immunoassay, 253
efficacy, intrauterine device (IUD), TCu380Ag, Cu-7, safety, long-term use, 269
endocrine monitoring, polycystic ovarian disease, induction of ovulation, follicle stimulating hormone, 163
endometrial carcinoma, inguinal mass, lymph nodes, 67
endometrial dating, ultrasound, endometrium, normal ovulatory cycle, ovarian hormone, follicular growth, 33
endometrium, ultrasound, normal ovulatory cycle, ovarian hormone, endometrial dating, follicular growth, 33
enzootic abortion, Chlamydia psittaci, pregnancy, spontaneous abortion, thrombocytopenia, 369
enzyme immunoassay, ectopic pregnancy, pregnancy specific β-1-glycoprotein, β-human chorionic gonadotropin, 253
enzymuria, acetyl-β-D-glucosaminidase, alanine aminopeptidase, kidney function in pregnancy, 9
epidemiology, pregnancy, ectopic, incidence, 351
ethacridine lactate, intrauterine fetal death, second trimester, sulprostone, 295
Ethibloc, selective embolization, hemorrhage, surgical complications, 289
excision biopsy, leiomyoma, female urethra, urethral tumor, rare lesion, benign neoplasia, 381
extra-uterine pregnancy, obstructed labor, ruptured uterus, peritonitis, celo-intestinal fistulae, 177

family planning clinic, Zaria, Nigeria, sexually transmitted disease, 365
fatty neoplasm, uterine sarcoma, liposarcomatous differentiation, 71
female urethra, leiomyoma, urethral tumor, rare lesion, excision biopsy, benign neoplasia, 381
fetal arrhythmia, antenatal diagnosis, developmental characteristics, dual echocardiography, real-time ultrasound, 13
fetal demise, prostaglandin E2, 171
fetal dimensions, true conjugate, maternal height, previous obstetric performance, cephalopelvic disproportion, previous cesarean section, 243
fetal macrosomia, perinatal mortality, maternal morbidity, perinatal morbidity, risk factors, 257
fetal mortality, pregnancy-induced hypertension, pre-eclampsia, eclampsia, pregnancy, 211
follicle stimulating hormone, polycystic ovarian disease, induction of ovulation, endocrine monitoring, 163
follicular growth, ultrasound, endometrium, normal ovulatory cycle, ovarian hormone, endometrial dating, 33

gangrene, tumor, torsion, cystectomy, salpingo-oophorectomy, hemorrhage, 21
genital tract, sarcoidosis, 373
gestational, trophoblastic, malignant, sequelae, hydatidiform, mole, 355
giant head sperm, testicular volume, sperm density, ponderal index, testicular measurement, 155
Gynatren, cervical intraepithelial neoplasia, immunopotentiation, vaginal smears, bacterial vaginosis, 41

health care dollars, hysterectomy, menstrual irregularities, prophylactic antibiotics, blood transfusion, human immunodeficiency virus, 137
hemorrhage, selective embolization, surgical complications, Ethibloc, 289
hemorrhage, tumor, torsion, gangrene, cystectomy, salpingo-oophorectomy, 21
histology, intramural part, uterotubal junction, anatomy, 343
β-human chorionic gonadotropin, ectopic pregnancy, pregnancy specific β-1-glycoprotein, enzyme immunoassay, 253
human immunodeficiency virus, hysterectomy, menstrual irregularities, prophylactic antibiotics, blood transfusion, health care dollars, 137
human oviductal function, radionuclide hysterosalpingography, in vitro fertilization, 53
hydatidiform, gestational, trophoblastic, malignant, sequelae, mole, 355
hysterectomy, menstrual irregularities, prophylactic antibiotics, blood transfusion, health care dollars, human immunodeficiency virus, 137
hysterosalpingography, laparoscopy, tubal infertility, 143

immature teratoma, ovarian cancer, pregnancy complication, metastatic ovarian tumor, torsion of the pedicle, 61
immunopotentiation, cervical intraepithelial neoplasia, vaginal smears, bacterial vaginosis, Gynatren, 41
incidence, pregnancy, ectopic, epidemiology, 351
induction of ovulation, polycystic ovarian disease, follicle stimulating hormone, endocrine monitoring, 163
infertile men, bacteriospermia, semen analysis, 149
inguinal mass, endometrial carcinoma, lymph nodes, 67
initial antenatal assessment, antenatal care, microcomputers, computerised questionnaire, patient input, 229
intramural part, uterotubal junction, anatomy, histology, 343
intrauterine fetal death, second trimester, ethacridine lactate, sulprostone, 295
intrauterine device (IUD), TCu380Ag, Cu-7, safety, efficacy, long-term use, 269
intravaginal, cervical ripening, prostaglandin gel, 221
in vitro fertilization, human oviductal function, radionuclide hysterosalpingography, 53
IUD users, pelvic inflammatory disease, 133

kidney function in pregnancy, enzymuria, acetyl-β-D-glucosaminidase, alanine aminopeptidase, 9

labor complications, pregnancy in adolescence, developing countries, delivery, cephalopelvic disproportion, 5
laminaria tent, uterine cervix, legal abortion, collagen, collagenolytic activity, 361
laparoscopic sterilization, uterine malformations, uterus didelphus, 287
laparoscopy, hysterosalpingography, tubal infertility, 143
legal abortion, uterine cervix, laminaria tent, collagen, collagenolytic activity, 361
leiomyoma, female urethra, urethral tumor, rare lesion, excision biopsy, benign neoplasia, 381

liposarcomatous differentiation, uterine sarcoma, fatty neoplasm, 71
liver needle biopsy, primary biliary cirrhosis, bilirubin, pregnancy, birth control pills, pre-eclampsia, 279
long-term use, intrauterine device (IUD), TCu380Ag, Cu-7, safety, efficacy, 269
lymph nodes, inguinal mass, endometrial carcinoma, 67
malignant, gestational, trophoblastic, sequelae, hydatidiform, mole, 355

maternal height, true conjugate, previous obstetric performance, fetal dimensions, cephalopelvic disproportion, previous cesarean section, 243
maternal morbidity, fetal macrosomia, perinatal mortality, perinatal morbidity, risk factors, 257
maternal mortality, cesarean sections, developing countries, 337
menstrual dates, biparietal diameter, ultrasound dates, normogram, 217
menstrual irregularities, hysterectomy, prophylactic antibiotics, blood transfusion, health care dollars, human immunodeficiency virus, 137
metastatic ovarian tumor, ovarian cancer, pregnancy complication, immature teratoma, torsion of the pedicle, 61
metronidazole, antibiotic prophylaxis, cesarean section, postoperative wound infection, metronidazole rectal suppositories, 103
metronidazole rectal suppositories, metronidazole, antibiotic prophylaxis, cesarean section, postoperative wound infection, 103
microcomputers, antenatal care, initial antenatal assessment, computerised questionnaire, patient input, 229
mole, gestational, trophoblastic, malignant, sequelae, hydatidiform, 355
myoma, ultrasound evaluation, pregnancy, 109

non-communicating rudimentary uterine horn, pregnancy, 275
normal ovulatory cycle, ultrasound, endometrium, ovarian hormone, endometrial dating, follicular growth, 33
normogram, biparietal diameter, menstrual dates, ultrasound dates, 217

obstructed labor, extra-uterine pregnancy, ruptured uterus, peritonitis, celo-intestinal fistulae, 177
Ogilvie's syndrome, colonic pseudo-obstruction, puerperium complications, cesarean section, postcesarean section complications, acute abdomen syndrome, 185
ovarian cancer, pregnancy complication, metastatic ovarian tumor, immature teratoma, torsion of the pedicle, 61
ovarian hormone, ultrasound, endometrium, normal ovulatory cycle, endometrial dating, follicular growth, 33
ovulation, progesterone, saliva, pregnanediol-3α-glucuronide, ultrasound, chemiluminescence immunoassay, 45
oxytocinase, stability, short-term fluctuations, pulsatile release, 331

patient input, antenatal care, initial antenatal assessment, microcomputers, computerised questionnaire, 229
pelvic inflammatory disease, IUD users, 133
perinatal morbidity, fetal macrosomia, perinatal mortality, maternal morbidity, risk factors, 257
perinatal mortality, fetal macrosomia, maternal morbidity, perinatal morbidity, risk factors, 257
peritonitis, extra-uterine pregnancy, obstructed labor, ruptured uterus, celo-intestinal fistulae, 177
polycystic ovarian disease, induction of ovulation, follicle stimulating hormone, endocrine monitoring, 163
polyhydramnios, amniocentesis, 181
ponderal index, testicular volume, sperm density, testicular measurement, giant head sperm, 155
postcesarean section complications, Ogilvie's syndrome, colonic pseudo-obstruction, puerperium complications, cesarean section, acute abdomen syndrome, 185
postoperative wound infection, metronidazole, antibiotic prophylaxis, cesarean section, metronidazole rectal suppositories, 103
postplacental IUD, spiked Lippes loop, uterine involution, ultrasonography, side-effects, 263
pre-eclampsia, pregnancy-induced hypertension, eclampsia, pregnancy, fetal mortality, 211
pre-eclampsia, primary biliary cirrhosis, bilirubin, liver needle biopsy, pregnancy, birth control pills, 279
pregnancy, *Chlamydia psittaci,* enzootic abortion, spontaneous abortion, thrombocytopenia, 369
pregnancy, ectopic, epidemiolcgy, incidence, 351
pregnancy, myoma, ultrasound evaluation, 109
pregnancy, non-communicating rudimentary uterine horn, 275
pregnancy, pregnancy-induced hypertension, pre-eclampsia, eclampsia, fetal mortality, 211
pregnancy, primary biliary cirrhosis, bilirubin, liver needle biopsy, birth control pills, pre-eclampsia, 279
pregnancy-induced hypertension, pre-eclampsia, eclampsia, pregnancy, fetal mortality, 211
pregnancy complication, ovarian cancer, metastatic ovarian tumor, immature teratoma, torsion of the pedicle, 61
pregnancy complications, cerclage, rupture of membranes, 237
pregnancy in adolescence, developing countries, labor complications, delivery, cephalopelvic disproportion, 5
pregnancy specific β-1-glycoprotein, ectopic pregnancy, β-human chorionic gonadotropin, enzyme immunoassay, 253
pregnanediol-3α-glucuronide, progesterone, saliva, ovulation, ultrasound, chemiluminescence immunoassay, 45
preterm birth, uterine monitoring, cost effectiveness, 127
previous cesarean section, true conjugate, maternal height, previous obstetric performance, fetal dimensions, cephalopelvic disproportion, 243
previous obstetric performance, true conjugate, maternal height, fetal dimensions, cephalopelvic disproportion, previous cesarean section, 243
primary biliary cirrhosis, bilirubin, liver needle biopsy, pregnancy, birth control pills, pre-eclampsia, 279
progesterone, saliva, pregnanediol-3α-glucuronide, ovulation, ultrasound, chemiluminescence immunoassay, 45
prophylactic antibiotics, hysterectomy, menstrual irregularities, blood transfusion, health care dollars, human immunodeficiency virus, 137
prostaglandin E2, fetal demise, 171

prostaglandin gel, cervical ripening, intravaginal, 221
puerperium complications, Ogilvie's syndrome, colonic pseudo-obstruction, cesarean section, postcesarean section complications, acute abdomen syndrome, 185
pulsatile release, oxytocinase, stability, short-term fluctuations, 331

radical hysterectomy, vesico-vaginal fistula, cancer cervix, vaginal reconstruction, sexual dysfunction, 77
radionuclide hysterosalpingography, human oviductal function, in vitro fertilization, 53
rare lesion, leiomyoma, female urethra, urethral tumor, excision biopsy, benign neoplasia, 381
real-time ultrasound, fetal arrhythmia, antenatal diagnosis, developmental characteristics, dual echocardiography, 13
risk factors, fetal macrosomia, perinatal mortality, maternal morbidity, perinatal morbidity, 257
ruptured uterus, extra-uterine pregnancy, obstructed labor, peritonitis, celo-intestinal fistulae, 177
rupture of membranes, cerclage, pregnancy complications, 237

safety, intrauterine device (IUD), TCu380Ag, Cu-7, efficacy, long-term use, 269
saliva, progesterone, pregnanediol-3α-glucuronide, ovulation, ultrasound, chemiluminescence immunoassay, 45
salpingo-oophorectomy, tumor, torsion, gangrene, cystectomy, hemorrhage, 21
sarcoidosis, genital tract, 373
second trimester, intrauterine fetal death, ethacridine lactate, sulprostone, 295
selective embolization, hemorrhage, surgical complications, Ethibloc, 289
semen analysis, bacteriospermia, infertile men, 149
sequelae, gestational, trophoblastic, malignant, hydatidiform, mole, 355
sexually transmitted disease, family planning clinic, Zaria, Nigeria, 365
sexual dysfunction, vesico-vaginal fistula, radical hysterectomy, cancer cervix, vaginal reconstruction, 77
short-term fluctuations, oxytocinase, stability, pulsatile release, 331
side-effects, postplacental IUD, spiked Lippes loop, uterine involution, ultrasonography, 263
sperm density, testicular volume, ponderal index, testicular measurement, giant head sperm, 155
spiked Lippes loop, postplacental IUD, uterine involution, ultrasonography, side-effects, 263
spontaneous abortion, *Chlamydia psittaci,* enzootic abortion, pregnancy, thrombocytopenia, 369
stability, oxytocinase, short-term fluctuations, pulsatile release, 331
staged repair, vesico-vaginal fistula, 27
sulprostone, intrauterine fetal death, second trimester, ethacridine lactate, 295
surgical complications, selective embolization, hemorrhage, Ethibloc, 289

TCu380Ag, intrauterine device (IUD), Cu-7, safety, efficacy, long-term use, 269
testicular measurement, testicular volume, sperm density, ponderal index, giant head sperm, 155
testicular volume, sperm density, ponderal index, testicular measurement, giant head sperm, 155
thrombocytopenia, *Chlamydia psittaci,* enzootic abortion, pregnancy, spontaneous abortion, 369
torsion, tumor, gangrene, cystectomy, salpingo-oophorectomy, hemorrhage, 21
torsion of the pedicle, ovarian cancer, pregnancy complication, metastatic ovarian tumor, immature teratoma, 61
traditional midwives, characteristics, beliefs and practices, Bangladesh, 119
trophoblastic, gestational, malignant, sequelae, hydatidiform, mole, 355
true conjugate, maternal height, previous obstetric performance, fetal dimensions, cephalopelvic disproportion, previous cesarean section, 243
tubal infertility, hysterosalpingography, laparoscopy, 143
tumor, torsion, gangrene, cystectomy, salpingo-oophorectomy, hemorrhage, 21
tumor staging, cervical carcinoma FIGO Ib, vaginal sonography, 283

ultrasonography, postplacental IUD, spiked Lippes loop, uterine involution, side-effects, 263
ultrasound, endometrium, normal ovulatory cycle, ovarian hormone, endometrial dating, follicular growth, 33
ultrasound, progesterone, saliva, pregnanediol-3α-glucuronide, ovulation, chemiluminescence immunoassay, 45
ultrasound dates, biparietal diameter, menstrual dates, normogram, 217
ultrasound evaluation, myoma, pregnancy, 109
urethral tumor, leiomyoma, female urethra, rare lesion, excision biopsy, benign neoplasia, 381
uterine cervix, laminaria tent, legal abortion, collagen, collagenolytic activity, 361
uterine involution, postplacental IUD, spiked Lippes loop, ultrasonography, side-effects, 263
uterine malformations, uterus didelphus, laparoscopic sterilization, 287
uterine monitoring, preterm birth, cost effectiveness, 127
uterine sarcoma, liposarcomatous differentiation, fatty neoplasm, 71
uterotubal junction, intramural part, anatomy, histology, 343
uterus didelphus, uterine malformations, laparoscopic sterilization, 287

vaginal reconstruction, vesico-vaginal fistula, radical hysterectomy, cancer cervix, sexual dysfunction, 77
vaginal smears, cervical intraepithelial neoplasia, immunopotentiation, bacterial vaginosis, Gynatren, 41
vaginal sonography, cervical carcinoma FIGO Ib, tumor staging, 283
vesico-vaginal fistula, radical hysterectomy, cancer cervix, vaginal reconstruction, sexual dysfunction, 77
vesico-vaginal fistula, staged repair, 27
